  - d. FCRA registration details (if applicable)
  - e. List of Governing Board Member with contact details
  
15. Date of Application:

## Annexure-I

### **Digital X-Ray Service to the TB Patients**

#### **Introduction:**

This partnership option may be explored to ensure that all patients have access to high-quality X-ray services in private-sector labs, irrespective if care is sought in public or private sector.

#### **Eligibility criteria for Service Provider**

- ✓ Service provider should be a registered entity.
- ✓ Should have a relevant license from state bodies/Clinical Establishment act/other relevant authorities.
- ✓ Should have qualified technicians to perform specific tests.
- ✓ Should have adequate infrastructure and equipment.
- ✓ Should have the X-Ray facility within 8 K.M. from the implementing site.
- ✓ Should be willing to undergo quality assurance process as per NTEP guidelines.
- ✓ Should have the facilities to ensure proper biomedical waste management.
- ✓ Should have a licence from Atomic Energy Regulatory Board and should follow all safety measures as prescribed by the Board and fulfil the Original Equipment Manufacturer recommendations.

#### **Role of Service Provider:**

- ✓ Recruit adequate personnel.
- ✓ Undergo training if required and adhere to NTEP guidelines.
- ✓ Maintain records and reports as given by NTEP.
- ✓ Provide chest X-ray (free of cost) for all presumptive TB cases referred by the programme or from identified private-sector healthcare providers.
- ✓ Ensure real-time reporting in Nikshay.

#### **Role of NTEP:**

- ✓ Prescribe the specification for infrastructure and equipments (if required).
- ✓ Provide formats for records and reports.
- ✓ Ensure timely payments to Service Provider.

#### **Budget:**

Grant-in-aid will be up to Rs 130 per Digital X-Ray with report including plate.

#### **Performance indicator and its linkage to payment:**

- ✓ This is a fee for service contract i.e., payment will be based on the number of X-rays completed as per authorized doctors' prescriptions with results (and images, as feasible).
- ✓ Deduct 20% from payment if time from the X-ray examination to reporting results is more than 24 hours.

- ✓ The second level – physical verification may be undertaken by the District assigned personnel / agency and could include :
- ✓ Verification of records from lab registers.
- ✓ Interview with 5% of TB patients who have availed services under this option.
- ✓ Random checking of at least 5% of the X-rays images, where feasible.
- ✓ If discordance is found during the verification mechanism, the assigned penalties may be applied and may be adjusted in payments of subsequent quarter.

**Verification Mechanism:**

- ✓ The first level of verification will be completed by reviewing and cross-checking with Nikshay records and/ or any other NTEP reports submitted for a defined period. Payments will be as per this verification.

*Note for consideration: Based on the local context, the partnership option could also account for report endorsement by a radiologist. It is desirable that all designated microscopy centres are co-located with X-ray centres to minimize patient inconvenience. Depending on the scale and number of X-ray laboratories engaged, RNTCP may budget for an additional Service Provider to set up a voucher system and manage reimbursements.*
